

Country:	Poland
Subject:	Polish Naval Vessels

25X1

On 23 June 1946 it was learned from a boiler construction expert at the shipyards at Jastarnia, on the Puck Peninsula, in the Hal-Puck Re-joined-ship, that two newly-constructed Polish naval vessels had been launched from the docks at Jastarnia on approximately 15 June 1946. They were described as belonging to the largest pre-war class of Polish navy vessels (destroyers?). No further details as to type or tonnage were available.

Geography: Jastarnia, also known as Jastarnia-War, is connected to the mainland by a normal gauge single-track railway. In 1940, there were several drydocks but no shipyards at Jastarnia. In April 1944 the construction of special naval installations at Jastarnia was reported but not confirmed. The site is said to have excellent security facilities because it cannot be seen from the mainland, and all traffic on the peninsula can be cut off by control of the railroad.)
